Let one of our in house electricians install an energy storage system for you today for only \$4,995.95. While power needs vary from home to home this,6.2kwh power station energy storage system will back up four key circuits in your home,for example lighting, internet modems, refridgerators, and medical devices or other critical loads.

Dont be left in the dark ever again!

Want To Take Charge of Your Electricity Usage?

Have one of our Licensed Electricians install the new Home Monitoring System that will let You see and dictate where every hard earned dollar of yours goes for as little as \$795.95, then start managing your electrical usage throughout your entire home. Stay connected through the app on your phone and be able to see if you did leave the stove on as You will have 24/7 access and also receive notifications. This system will help you spot inefficiencies with all your equipment and electrical usage. It's like having a doctor for your appliances.

It's time to give your home a voice

Want To Start Saving Money Today?

The answer is one of our most popular products; the Energy Management System (EMS). Benefits of the EMS are immediate as it will provide surge protection for your entire home and equipment, Electro Magnetic Field (EMF) reduction, line conditioning, voltage regulation, harmonics reduction, equipment longevity and most importantly reduce your electrical consumption. The manufacturers of the EMS even tout an astonishing 8-18% savings off your electric bill alone. Get yours installed today for \$1795.95.
